

Agency Client Onboarding Agent

Setup Guide

Version 1.0

For Make.com (formerly Integromat)

~15 minute setup

Congratulations on purchasing the Agency Client Onboarding Agent!

This guide walks you through every step of setting up your new automation workflow in Make.com. By the end, you'll have a fully functioning client onboarding system that saves you 3-5 hours per new client.

Quick Start

1. Import the Blueprint into Make.com

1. Go to your Make.com account
2. Click **Create a new scenario**
3. Click the three dots (:) menu → **Import Blueprint**
4. Paste the JSON from `deployed-blueprint.json`
5. Click **Save**

2. OR Open the Pre-Configured Scenario

Direct link: [<https://us2.make.com/scenario/5707191/edit>](https://us2.make.com/scenario/5707191/edit)

3. Connect Your Accounts

After importing, you'll need to connect:

- **Gmail** → Send welcome emails
- **Google Drive** → Create client folders
- **Google Sheets** → Log client records
- **Slack** → Team notifications

Click each module that shows a red warning indicator and authorize the connection.

4. Configure Your Webhook

Replace the HTTP trigger with a Make.com **Webhook** module:

- Right-click the HTTP module → **Replace** → Search "Webhook" → Select **Webhook** → **Custom Webhook**
- Click **Add** to generate your unique webhook URL
- Use this URL in your client intake forms (Typeform, Gravity Forms, etc.)

What This Workflow Does

When a new client fills out your intake form (webhook), this workflow automatically:

1. **Analyzes** the client intake data with AI (GPT-4o)
2. **Generates** a personalized welcome plan, timeline, and task checklist
3. **Creates** a structured Google Drive folder with 7 subfolders
4. **Creates** an Asana project with phases and sections

5. **Notifies** your team via Slack with links to everything
6. **Sends** a warm welcome email to the client
7. **Logs** everything to a Google Sheets tracker
8. **Creates** a client record in Notion
9. **Returns** a confirmation with links

Prerequisites

| Account | Type Needed | Cost |

|---|---|---|

| Make.com | Free or Pro | Free tier works |

| OpenAI | API account | Pay-as-you-go (~\$0.10/workflow) |

| Google Workspace | Business | Usually already have |

| Asana | Free or Premium | Free tier works |

| Slack | Any workspace | Free tier works |

| Notion | Any workspace | Free tier works |

Step 1: Import the Blueprint into Make.com

1. Go to [make.com](https://www.make.com) and log in
2. Click **Create a new scenario**
3. Click the **three dots** (;) → **Import Blueprint**
4. Select the `agency-client-onboarding-blueprint.json` file
5. Click **OK**

The scenario will appear with all 10 modules connected.

Step 2: Configure Each Module

Module 1 — Webhook (Client Intake Form)

1. Click the webhook module
2. Copy the webhook URL
3. Paste this URL into your:
 - Google Form (use Formatter add-on)
 - Or Typeform (webhook integration)
 - Or your own website form

1. Set up the form with these fields:

- Client Name (text)
- Company Name (text)
- Email (email)
- Phone (text)
- Service Type (dropdown)
- Project Scope (textarea)
- Budget Range (text)
- Start Date (date)

Module 2 — OpenAI (AI Welcome Plan)

1. Click the OpenAI module
2. Click **Add connection** → **OpenAI**
3. Enter your **OpenAI API Key**
 - Get it at: <https://platform.openai.com/api-keys>
1. Model: `gpt-4o` (recommended) or `gpt-4o-mini` (cheaper)
2. The system prompt is pre-configured — customize if needed

Module 3 — JSON Parser

- This module extracts sections from the AI response
- No configuration needed (auto-configured)

Module 4 — Google Drive Folder Creator

1. Click the module
2. Click **Add connection** → **Google Drive**
3. Sign in with your Google Workspace account
4. Set **Parent Folder** — create a folder called "Client Projects" in your Google Drive and paste its ID here
5. The 7 subfolders are pre-configured

Module 5 — Asana Project Creator

1. Click the module
2. Click **Add connection** → **Asana**
3. Authorize with your Asana account
4. Set **Workspace** and **Team** from the dropdowns
5. Project sections are pre-configured

Module 6 — Slack Notification

1. Click the module
2. Click **Add connection** → **Slack**
3. Authorize with your Slack workspace

4. Select the **Channel** where your team wants notifications
5. The message template is pre-configured

Module 7 — Gmail Welcome Email

1. Click the module
2. Click **Add connection** → **Gmail**
3. Sign in with your agency email
4. Set **CC** to your team email
5. Subject line and body are pre-configured

Module 8 — Google Sheets Tracker

1. Create a Google Sheet called "Client Onboarding Tracker"
2. Add header row: Date, Client Name, Company, Email, Service, Budget, Start Date, Status, Drive Link, Asana Link
3. Click the module → **Add connection** → **Google Sheets**
4. Select your spreadsheet and sheet

Module 9 — Notion Client Record

1. Create a Notion database called "Clients"
2. Add properties: Client Name (title), Company (text), Email (email), Phone (phone), Service (select), Status (select), Start Date (date), Google Drive (url), Asana Project (url)
3. Click the module → **Add connection** → **Notion**
4. Authorize with your Notion workspace
5. Select your Clients database

Module 10 — Webhook Response

- Auto-configured. Returns success data to your form.

Step 3: Test the Workflow

1. Click **Run once** in Make.com
2. Submit your test form with sample data
3. Check:
 - ☐ Google Drive folder created with 7 subfolders
 - ☐ Asana project appears with sections
 - ☐ Slack notification sent
 - ☐ Welcome email received
 - ☐ Google Sheets row added
 - ☐ Notion client record created
 - ☐ Confirmation returned to form

Step 4: Schedule & Activate

1. Click the clock icon in Make.com
2. Set schedule: ****Every 15 minutes**** (for forms) or ****Immediately**** (for webhooks)
3. Toggle ****ON****
4. Name your scenario: `Client Onboarding Agent`

Customization Guide

Adding More Tools

Want to connect other tools? Add modules for:

- ****HubSpot**** — Create contact + deal
- ****QuickBooks**** — Create invoice
- ****Calendly**** — Schedule kickoff call
- ****Zoom**** — Create meeting template
- ****DocuSign**** — Send agreement for signature

Modifying the AI Prompt

Edit the OpenAI system prompt to match your agency's tone:

- Change the welcome message style
- Add specific deliverables unique to your services
- Include compliance disclaimers (GDPR, HIPAA)

Adding Conditional Logic

Want different flows for different service types?

- Add a ****Router**** module after the webhook
- Route based on `service\_type` to different project templates
- Each route can have its own Asana template, Drive folder, and email

Troubleshooting

| Problem | Solution |

|---|---|

| "Connection error" | Re-authorize the app connection in Make.com |

| AI returns nonsense | Adjust the system prompt — be more specific |

Google Drive folder not created	Check parent folder ID and permissions
Email not sending	Check Gmail rate limits (500/day)
Slack message not posting	Ensure bot is invited to the channel
Webhook not receiving data	Check form integration — test with Postman

API Keys Overview

Service	Where to Get It	Cost
OpenAI	<https://platform.openai.com/api-keys>	\$0.01-0.10/run
Google Drive	Automatic via Make auth	Free
Asana	Automatic via Make auth	Free
Slack	Automatic via Make auth	Free
Gmail	Automatic via Make auth	Free
Notion	<https://www.notion.so/my-integrations>	Free
